## Professional Summary

Computer Science undergraduate focused on Android and cross-platform mobile development. Skilled in Flutter, Dart, Kotlin, XML, Firebase, REST API integration, MVVM architecture, and backend-connected mobile applications. Seeking an Android Development Internship to build scalable, user-friendly, and production-ready mobile applications.

## Education

**B.Tech – Computer Science** 2024–2028
KIET Group of Institutions
SGPA: 8.61 (Till 3rd Semester)

**Class XII – ISC** 2024
94.25%

**Class X – ICSE** 2022
93.8%

## Projects

**NutriLens – Smart Food Nutrition Analyzer** Mar 2026 – Present
GitHub Repository

- Built Flutter-based mobile application for AI-powered food recognition and nutrition tracking.
- Integrated Flask REST APIs for image upload, food prediction, and calorie estimation.
- Used Firebase Firestore to store daily nutrition logs including calories, protein, carbs, and fat.
- Designed responsive UI screens for image selection, prediction results, and history tracking.
- Connected Flutter frontend, Flask backend, and ML prediction module through API integration.

**AI Interview Coach App** Feb 2026 – Present
GitHub Repository

- Developed Flutter application for AI-based interview practice with text and speech workflows.
- Integrated FastAPI backend with Firebase for interview response analysis and result storage.
- Implemented reusable UI components, navigation flow, and structured screen architecture.
- Added answer quality, keyword relevance, filler-word detection, and performance feedback modules.
- Followed scalable mobile app structure using state management and API-driven data flow.

**GradeBoost – Mathematics Learning App** Nov 2024 – Dec 2024
GitHub Repository

- Developed Android application using Kotlin and XML for structured mathematics learning.
- Implemented multiple screens, navigation flow, and module-based educational content.
- Worked on Android UI layouts, app logic, and user interaction flows.
- Secured First Prize at National Mathematics Day Project Presentation event.

## Coursework

- Object-Oriented Programming using Java
- Data Structures and Algorithms
- Database Management Systems
- Operating Systems
- Computer Networks
- Web Technology and API Integration

## Technical Skills

- **Mobile Development:** Flutter, Dart, Kotlin, XML, Android SDK
- **Android Concepts:** MVVM, Clean Architecture, Jetpack Components, Navigation
- **API Integration:** REST APIs, JSON Parsing, HTTP Requests, Retrofit
- **Database:** Firebase Firestore, Firebase Auth, MongoDB, SQLite, Room Database, NoSQL
- **Backend:** Flask, FastAPI, API Development
- **State Management:** Provider, Riverpod, Structured App Architecture
- **Tools:** Git, GitHub, VS Code, Android Studio, Postman
- **Programming:** Java, Kotlin, Dart, Python, C

## Certifications

### Mobile Development

- Flutter Certificate
- Dart Certificate

### Backend and Database

- Flask Certificate
- NoSQL Databases Certificate
- Oracle SQL Certificate

### Programming

- Java OOPS Concepts Certificate
- Oracle Java Foundation Certificate

## Positions and Achievements

- Member – DSDL, Machine Learning Domain
- Member – Innogeeks, Android Domain
- Participated in Innogeeks Winter of Code 3.0
- First Prize – National Mathematics Day Project Presentation
- Built AI-integrated applications with backend and database connectivity
